

**GPS Data Check  
November 16 2012**

**Dean,**

**According to my review between the .gdb file that you mailed me and the data file from the web, there are several missing waypoints, a couple of simple errors, and a couple of waypoints that need to make the next gps file and book printing.**

**I've listed those that I found below. If you find that the gps data is correct and my checking procedure failed, then let me know and I will resolve my maps/wpts files.**

**Warren**

**Abbreviations:**

**gps – file provided by Dean;**

**xls – my .xls worksheet;**

**pdf – data book downloaded from site**
